The Education System in India

India has a unique education system designed to uphold its nation's culture, history, values, and customs.

While traditionally, education in India was reserved mostly for the higher-caste children, new education policies have been aiming to achieve equity in education and the right to education for all children irrespective of social class.

Our Company is a growing educational sector company, which is the key to nation building. It is also well-accepted that providing the right knowledge and skills to the youth can ensure fiscal and national progress.

According to our company the basis of learning is not only to read books and memorise information, but the well-rounded, holistic development of a child. This included their mental, cognitive, physical and spiritual wellness.

We also explore ways you can empower your child's thirst for knowledge while meeting new classroom demands and needs, across primary, secondary and higher education.

The emphasis is on developing student's human values such as self-reliance, right behaviours, empathy, creativity, plus strong moral and ethical behaviours. The aim is that knowledge could later be practically implemented to find solutions to real-life problems.

Due to COVID-19 pandemic, the industry has been affected evidently due to suspension of schools over a continued period. But still educational institutions are exploring ways to keep students engaged virtually and maintaining the learning momentum. While all educational institutions are not equipped to connect with students, some have started video conferencing facilities for streaming online classes.

New opportunities in the pre-school segment include teacher's training, inclusion of day care services, provisioning of after school extra-curricular activities and edutainment products.

Our Company also intends to exploit the opportunities that are available in the Education Sector and our operations will cover all aspects for development of Education.

Importance of Pre School Education in India

Pre School education plays a very pivotal role in a toddler's life. Preschool education offers an enriched environment, academic simulation and many socialization opportunities for children who are of the same age group. Early schooling in India plays an important role in preparing children emotionally, mentally, socially and physically for higher education and proper understanding of different subjects.

Good primary education inspires both parents and students to enroll for pre-primary and higher level at the later stages of higher studies. India follows a systematic process of preschool education to impart knowledge in the best possible way for better understanding of the young children. By following an easy and interesting curriculum, teachers strive hard to make the entire learning process enjoyable for the children.

Pre School and Kindergarten methods lay a solid foundation for children and help them to grasp knowledge easily in the later stages of school and college life.

Our School respect each child's path of learning and growth and give them the liberty to choose the activities they are interested in. Our Teachers give equal attention to the children and motivate them to take part in different activities that makes pre schooling interesting and help them learn new things in life. Special educational facilities are made available to the children to make sure that no child is neglected.

Pre-primary education in India provides a culturally sound environment for the children and instills the right values to help them grow both mentally and physically. Pre schooling facilitates in grooming young minds and provides dynamic and complete development of children. By creating a formal learning environment for children, pre-primary school education helps them to understand the importance of learning and discipline.

K-12 Education

K12 education in India has brought about drastic changes in the education system. It has changed the overall concept of education with respect to content, resource, management, and communication.

Currently, K12 education system is made compulsory to be adopted by the state and central government schools. This kind of education system was formed to increase interaction between students and teachers for effective learning and teaching opportunities.

The concept of K-12 education is widely spread across the world. Do you know how it is different from the conventional education system? It basically focuses on student and teacher communication. It includes interaction sessions between the teachers and students of Kindergarten to the 12th standard.

The government is taking initiatives for developing the K12 education system all across the country. Teachers put a lot of effort in improving the learning outcomes with effective interaction as much as possible. Here, technology plays an important role in enhancing learning opportunities for students and providing different teaching strategies for teachers.

Schools are developing and implementing classroom activities to help students in building physical and academic skills. Students and teachers are adapting different learning tools for gaining knowledge and skills. Advanced learning platforms with the help of technology have definitely changed the way educators teach and students learn.

Competition

India has the third largest higher education system in the world, and is behind only the US and China in this area. Our higher educational institutions churn out around 2.5 million graduates every year. However, this caters to just about 10 per cent of India's youth and the quality of this output is considered below par.

Our higher education sector is increasingly incapable of meeting the rising expectations of an emerging India. Indian universities, which should have been the centre of cutting edge research and a hub of intellectual activity, are more often in the news for political machinations than for research excellence. Years of low investment in higher education along with a mistaken belief that providing uniform support to all universities irrespective of their quality have led to a situation where neither our academics nor our students have any incentive to undertake cutting-edge research.

*Annexure "A" to the Independent Auditor's Report
Responsibilities for Audit of Financial Statement*

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has internal financial controls with reference to Financial Statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit, and

in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Annexure "C" to the Auditors' Report

Report on the Internal Financial Controls under Clause (f) of sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

Opinion

We have audited the internal financial controls over financial statements of M/S. SHANTI EDUCATIONAL INITIATIVES S LIMITED ("the Company"), as of 31 March, 2022, in conjunction with our audit of the standalone financial statements of the Company as at and for the year ended that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to standalone financial statements and such internal financial controls were operating effectively as at 31 March 2022, based on the internal financial controls with reference to standalone financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal controls over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibility include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the 'Guidance Note') and the Standards of Accounting, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an

understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of the Management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
